

# BURAK

## M&T | Lever Handle

Finish Shown: Black Chrome (Cr-K)

**Material** Handle: Solid Brass  
Rosette: Stainless Steel

**Dimension for Application** Recommended door thickness: 38.5 - 44mm. Options for door thickness 38-126mm is available.

**10 Finishes**

Satin Nickel - Grinded	SNi	
Glossy Chrome	Cr	
Black Chrome	Cr-K	

Titanium / PVD Finishes

Black	TiN-K	
Brushed Brass	TiN-A	
Gunmetal	TiN-C	
Light Bronze	TiN-B	

Brass Finishes

Natural Brass	Ms	
Polished Brass	Ms-L	
Antique Brass	Ms-A	

Door preparation: Drilling a Ø 24-25mm hole.

**Magnetic Rosette** Handles with magnetic rosettes can be fully inserted into the door, be careful of the weakened side of the rebated and reversed doors. Thickness of the rosettes is 5 mm.

The space/depth of insertion for the magnetic rosette including the returned spring and handle neck is 8.5 mm.

**Warranty**

Mechanics:	3 years
SNi, Cr:	3 years
Titanium:	15 years
Brass:	Lifetime

**Mounting** Bolt-Through Fixing

## ROSE VARIATION

### NON-MAGNETIC

Available in a choice of **8 finishes** with a **guarantee of 3-15 years** depending on the finish. Suitable for interior and exterior doors. Round non-magnetic rose comes in **depths of 7mm**.

### MANUFACTORY MECHANICS M 2000

Mechanics of the non-magnetic rose

Mechanics M 2000 - designed, manufactured and assembled at M&T - with own patented slip system which prevents bending and cracking the door in lock area. Simple and fast assembly.

### MAGNETIC

Available in a choice of **10 finishes** with a **guarantee of 8-15 years** depending on the finish. Suitable for interior and exterior doors. Round magnetic rose comes in **5mm**.

### MANUFACTORY MECHANICS M 2018

Mechanics of the magnetic rose

Designed, manufactured and assembled in M&T - with its own patent of the rosette using neodymium magnets and a system of returned springs.

Satin Nickel (SNI)

Two Tease offers a range of lock options for handles.

## Titanium Finish

The surface of the door handles and labels M&T is coated with a hard, chemically stable film using methods PVD and PACVD. This technological process is done under lower pressure in vacuum chambers. In the PACVD (Plasma Assisted Chemical Vapour Deposition) process, the coating grows due to heterogeneous chemical reaction on the surface of the substrate.

necessary for the chemical reaction so the reaction temperature can be lower. Moreover, the properties of the growing layer can be controlled by the variation of the plasma parameters. In the PVD (Physical Vapour Deposition) process, the coating grows due to deposition of atoms coming from a solid-state target place in the vacuum recipient walls.

The reaction substances are supplied in the gas phase. These gases are activated in low temperatures plasma where molecules are dissociated and radicals, ions and excited atoms arise. It decreases the activations energy

## Advantages

A thin layer of 2 microns has several advantages, which makes it so exceptional:

### The extraordinary hardness

7 times harder than handles with a protective baked enamel

### High resistance to abrasion and scratching

Cannot be damaged/ scratched with normal use

### Colours and chemical stability

The surface even after many years has the same colour

### Corrosion

Quality applied coatings are only slightly microporous, which prevents the penetration of small particles to material of handle and thus the formation of corrosion.

## BRASS FINISH

- Internal and external use
- Anti-microbial
- Maintenance Free - cotton or micro fibre use
- Lead time: 10 weeks
- Lifetime guarantee for brass

### Natural Brass (MS)

Mechanically treated surface on a brass product with a soft texture and colours. The surface ages naturally and the colour changes in according to the weather conditions and climatic conditions.

### Polished Brass (Ms-L)

Mechanically polished brass surface with a high gloss finish which will gradually patina. Surface gets naturally old and changes colour and appearance according to frequency of use on a brass product with the effect of several years use providing an aged finish. The brass has a combination of lighter and darker shades, and the surface will naturally age and change its colour according to the climatic conditions.

### Polished Brass (Ms-A)

Mechanically modified surface on a brass product with the effect of several years use providing an aged finish. The brass has a combination of lighter and darker shades, and the surface will naturally age and change its colour according to the climatic conditions.

## OTHER FINISHES

Cr: Glossy Chrome

SNi: Matt Nickel

Cr-K: Chrome Black
