

ANDY

M&T | Lever Handle

Finish Shown: Antique Brass (Ms-A)

Material Handle: Solid Brass
Rosette: Magnetic
Stainless Steel

Dimension for Application Recommended door thickness: 38.5 - 44mm. Options for door thickness 38-126mm is available.

Door preparation: Drilling a Ø 24-25mm hole.

11 Finishes Matt Nickel SNI 
Glossy Chrome Cr 
Black Chrome Cr-K 

Titanium / PVD Finishes Black TiN-K 
Brushed Brass TiN-A 
Gunmetal TiN-C 
Light Bronze TiN-B 
Matt Bronze TiN-S 

Brass Finishes Natural Brass Ms 
Polished Brass Ms-L 
Antique Brass Ms-A 

Magnetic Rosette Handles with magnetic rosettes can be fully inserted into the door, be careful of the weakened side of the rebated and reversed doors. **Thickness of the magnetic rosettes is 5 mm.**

The space/depth of insertion for the magnetic rosette including the returned spring and handle neck is **8.5 mm.**

Warranty Mechanics: **3 years**
SNI, Cr: **3 years**
Titanium: **15 years**
Brass: **Lifetime**

Mounting Bolt-Through Fixing

NON-MAGNETIC

Available in a choice of **9 finishes** with a **guarantee of 3-15 years** depending on the finish. Suitable for interior and exterior doors. Round & square non-magnetic rose comes in **depths of 7mm**.

	SNi		TiN-S
	Cr		Ms
	TiN-K		Ms-L
	TiN-A		Ms-A
	TiN-C		

MAGNETIC

Available in a choice of **10 finishes** with a **guarantee of 8-15 years** depending on the finish. Suitable for interior and exterior doors. Round & square magnetic rose comes in **depths of 5mm**.

	SNi		TiN-C
	Cr		TiN-B
	Cr-K		Ms
	TiN-K		Ms-L
	TiN-A		Ms-A

MANUFACTORY MECHANICS M 2000

Mechanics of the non-magnetic rose

Mechanics M 2000 - designed, manufactured and assembled at M&T - with own patented slip system which prevents bending and cracking the door in lock area. Simple and fast assembly.

MANUFACTORY MECHANICS M 2018

Mechanics of the magnetic rose

Designed, manufactured and assembled in M&T - with its own patent of the rosette using neodymium magnets and a system of returned springs.

TITANIUM FINISH

The surface of the door handles and labels M&T is coated with a hard, chemically stable film using methods PVD and PACVD. This technological process is done under lower pressure in vacuum chambers. In the PACVD (Plasma Assisted Chemical Vapour Deposition) process, the coating grows due to heterogeneous chemical reaction on the surface of the substrate.

necessary for the chemical reaction so the reaction temperature can be lower. Moreover, the properties of the growing layer can be controlled by the variation of the plasma parameters. In the PVD (Physical Vapour Deposition) process, the coating grows due to deposition of atoms coming from a solid-state target place in the vacuum recipient walls.

The reaction substances are supplied in the gas phase. These gases are activated in low temperatures plasma where molecules are dissociated and radicals, ions and excited atoms arise. It decreases the activations energy

ADVANTAGES

A thin layer of 2 microns has several advantages, which makes it so exceptional:

- The extraordinary hardness** 7 times harder than handles with a protective baked enamel
- High resistance to abrasion and scratching** Cannot be damaged/ scratched with normal use
- Colours and chemical stability** The surface even after many years has the same colour
- Corrosion** Quality applied coatings are only slightly microporous, which prevents the penetration of small particles to material of handle and thus the formation of corrosion.

BRASS FINISHES

- Internal and external use
- Anti-microbial
- Maintenance Free - cotton or micro fibre use
- Lead time: 10 weeks
- Lifetime guarantee for brass
- Living finishes

Natural Brass (MS)

Mechanically treated surface on a brass product with a soft texture and colours. The surface ages naturally and the colour changes in according to the weather conditions and climatic conditions.

Polished Brass (Ms-L)

Mechanically polished brass surface with a high gloss finish which will gradually patina. Surface gets naturally old and changes colour and appearance according to frequency of use on a brass product with the effect of several years use providing an aged finish. The brass has a combination of lighter and darker shades, and the surface will naturally age and change its colour according to the climatic conditions.

Antique Brass (Ms-A)

Mechanically modified surface on a brass product with the effect of several years use providing an aged finish. The brass has a combination of lighter and darker shades, and the surface will naturally age and change its colour according to the climatic conditions.

OTHER FINISHES

Cr: Glossy Chrome

SNi: Matt Nickel

Cr-K: Chrome Black
